

Because You Expect The Best

www.byrdinternational.com

We at Byrd take great pride in offering the highest quality blue swimming crab meat available in the market today. Our crabs are wild caught by fishermen in the pristine Southern Pacific waters of South East Asia. Our products are processed at state-of-the-art facilities in prime harvest areas, ensuring the highest quality flavor, texture and appearance in every can of Byrd Premium Crab Meat.

As a fully integrated company, we staff our own highly trained and HACCP certified personnel in our plants to guarantee the highest standards are adhered to during every stage of the production of Byrd Premium Crab Meat. Careful cooking and picking procedures are in place to make certain that the products we produce provide consistently superior quality, sweet flavor, firm texture and appetizing appearance that discerning customers look for in a crab meat. Whether used to prepare the finest crab cakes, your chef's signature entrée or sold to your valued retail customer, our total commitment to quality and satisfaction will provide you with a premium product that will have them coming back for more.
